

IN THE CLAIMS

Please amend claims 1 and 28 as follows. A copy of the marked-up original claims 1 and 28 is attached to this Response showing the changes, as required by amended 37 C.F.R. §1.121.

Sub C 17
B 2

17. (Twice Amended) A soft sided, collapsible, insulated container comprising:

- a first collapsible insulated container portion defining a first insulated chamber therewithin;
- a second collapsible insulated container portion defining a second insulated chamber therewithin;
- said first and second insulated container portions having respective first and second insulated wall structures, said insulated wall structures including respective insulated sidewall panels;
- said insulated chambers being located side-by-side, and being segregated by a common wall;
- said first insulated wall structure having a first opening defined therein for providing access to said first enclosed chamber, a portion of said first insulated wall structure being moveable to close said first opening;
- said first chamber being maintainable at a different environmental condition from said second chamber.

Sub C 28
B 3

28. (Amended) A soft sided, collapsible, insulated container comprising:

- a first collapsible insulated container portion, a second collapsible insulated container portion and a common wall shared between said first and second container portions;

CI
B

said first container portion having a first insulated wall structure defining a first enclosed chamber therewithin;

said first insulated wall structure having a first opening defined therein for providing access to said first enclosed chamber, a portion of said first insulated wall structure being moveable to close said first opening;

said second container portion having a second insulated wall structure defining a second enclosed chamber therewithin;

said common wall segregating said first and second enclosed chambers from each other;

said first chamber being maintainable at a different environmental condition from the environmental condition of said second chamber; and

said first container portion being moveable between an expanded position and a collapsed position relative to said common wall, said first container portion being securable in said collapsed position.
